

# SPILL PREVENTION & CONTROL

## Introduction

This course will provide your staff with the information they need to prevent a spill and where this is not possible minimise the impact on themselves, others, your business and the environment.

## Course Overview

At the end of the course, trainees will be able to:

- Recognise different types of spills
- Recognise the common types of storage
- Identify the best ways to move and transfer liquids
- Understand how inspection and training can reduce the likelihood of spills
- Respond quickly and correctly to spills in your workplace

## Course chapters

### 1. Spill Prevention

This section will cover the different types of spills, common types of storage and secondary containment. The moving and transferring of liquids, spills and leaks, inspections and training.

### 2. When a Spill Occurs

This section will cover identifying a spill and the key steps of a spill response. Common types of spills kits, waste disposal and reporting spills.

## Who will it benefit?

This course is designed for those who want to learn more about spill prevention and control.
